OBJECTIVE

Results-driven and enthusiastic Cloud specialist with 2.5 years of experience across various aspects of the industry. Seeking a challenging position in a dynamic organization where I can apply my diverse skill set and continues to develop my knowledge in different areas. Committed to contributing to the success of projects, collaborating with cross-functional teams, and delivering high-quality results. Eager to gain valuable experience and advance my career in a fast-paced and innovative environment.

FUNCTIONAL COMPETENCIES

- | Remote Assistance | Problem-solving | Project Management | Team Collaboration | Cloud services | Trouble Shooting | DevOps

HIGHLIGHTS OF QUALIFICATION

- **Infrastructure Deployment:** Deployed and configured AWS services such as EC2 instances, S3 buckets, RDS databases, load balancers, VPCs (Virtual Private Clouds), and other resources according to business requirements.
- **Automation and Scripting:** Experienced with automation tools like AWS CloudFormation.
- **Git:** Proficient in using Git for version control, branching, merging, and collaboration in software development projects.

TECHNICAL SKILLS

- **Cloud Technologies:** AWS.
- **Scripting languages:** Java, PowerShell, JS (JavaScript), Html, CSS, ReactJS. TCL.
- **Operating Systems:** Windows. Linux.
- **Tools:** Terraform, Dynatrace, salesforce, Okta, CMDB, HostMonitor, Splunk, Visual studio, MySQLWorkbench, Wire shark.
- **Databases:** Oracle, MYSQL.
- **Workstation:** Citrix, VMware
- **Version Control:** Git (GitHub)

PROFESSIONAL EXPERIENCE

FoundEver CRM India Private Limited, Cloud Specialist (NOC Analyst). **Aug'23-Present**

- Troubleshoot and resolved service issues to ensure optimal application performance and stability.
- Modified Terraform scripts in a critical situation to stabilize CPU and memory usage across multiple nodes.
- Addressed infrastructure server issues for both on-premise and cloud-based environments, including AWS and Terraform-managed servers.
- Supported server patching activities to facilitate system upgrades and maintain security.
- Collaborated with cross-functional teams including infrastructure, database, DevOps, and incident management to address and resolve critical server downtimes.
- Resolved configuration issues across various application services to improve reliability and functionality.

Technosprint info solutions, India- Associate Trainee

Jan'22-May'23

- Utilized YAML to define and deploy infrastructure on AWS EC2, integrating SQLite for initial development and PostgreSQL for production.
- Configured databases for application data management, ensuring scalable and reliable storage solutions.
- Implemented AWS CloudWatch for real-time metrics and log monitoring, enabling efficient performance tracking and issue detection.
- Established IAM roles and policies for secure interaction with AWS services and data protection.

EDUCATION

IFET College of Engineering, TN, India

Aug'18-June'22

Bachelor of Electronics and Communication Engineering.

Achievements:

- Successfully resolved technical issues within the SLA.
- Received recognition for consistently providing exceptional support to customers as an individual contributor.
- Improved the internal knowledge management system by creating and updating documents with detail oriented to applications and software tools.
- Independently managed surge alerts and resolved critical server issues in the production environment.
